THE CRETONNE FAD.

Collar, Hat Trimmings, Coats and Parasols in This Fabric.

A cretonne flower and leaf introduced like a rare bit of embroidery into the collar of a silk coat and snapplly edged with black is distinctive and charming. So is a gay little waistcoat, striped and flowered and sprinkled with buttons, to be worn under a dashing cutaway coat. When It comes, however, to huge "Merry Widow" sailor hats, with stiff brims roses that are ruthlessly lopped away to sult the exigencies of hat shaping and tortured with rows of stitching in surgicul suggestion through delicate petals, the effect is not so happy. trellis in generous bloom.

the flat "angel child" collar, which has Cochin breed. come to stay, at least while warm weather makes it so eminently the comfortable thing. To match the flowers in these turned down cretonne collars there are gay little bows of rose pink or other flower colors.

Applique of cretonne may be used with charming effect in combination with embroidery stitches on vests, collars, cuffs and other trimmings. One progressive young woman has fashfoned a rose pink linen frock with a garland border of cretonne roses-in much the effect of the rose garland borders on smart wall paper. The garlands, cut out from the cretonne, are re-enforced with a light facing underneath to keep the cretonne from curling and are appliqued to overskirt or tunic edge and to the edges of the jumper sleeve.

Another clever maid has clipped long festoons of violets from a dainty | ter fat is lowest. bedroom cretonne and has applied them to a white net evening frock, It will pay you to step into the Peo- the color tone being carried out by ple's Shoe Store Saturday or Monday tiny violet velvet ribbons threaded through the net.

HINTS FUR FARMERS

Breed and Variety.

The distinction between breed and variety is not always remembered, mountain village of Greendale, says the Farmers Advocate. Some of the two words are entirely distinct.

of poultry, such as Plymouth Rocks, church as he led the village choir. Wyandottes, Cochins, Brahmas, Legof these breeds. Thus the Plymouth Rock "breed" is divided into the three variety of the Plymouth Rock breed. Neither is the cretonne parasol, which It is not correct to speak of the Buil -come upon unexpectedly from the Cochin breed, but the Buff Cochin varear-looks a bit like an animated rose riety, the other Cochin varieties being In neckwear cretonne is shown in These four varieties make up the one

Dairy Gossip. Get rid of the hard milking cow. It takes as much muscle to milk her as it does four or five easy milkers,

It is good policy to keep the cow up to her maximum production from the time she freshens until you want her to go dry.

Special purpose ideas in the dairy management are just as essential to successful butter production as is the special purpose cow. Cows of strong dairy temperament

are what we must strive to produce. When we get into the dairy business for what there is in it none other is worth fooling with. Breed the cows to give the largest

yield of milk at the time when butter fat is worth the most money. Give the cow a two months' rest when but-

Notes About Bees. Success in beekeeping depends largely on the man.

The orchard is one of the best places to keep bees.

The best way to keep millers out of tives is to keep the hives full of bees. The life of a bee during the busy season is very short. Often during the honey senson they do not live longer than six or eight weeks.

The prime swarm yields the surplus. Keep honey, whether in the comb or extracted, in a dry place, as it will readily absorb moisture and become thin, watery and worthless.

Waste In Poultry Raising.

There is lots of waste in handling poultry, and waste wherever it appears should be combated. One common waste on the farm is seen about Mosto diagguring skin eruptions, scrof- this time of year, when a lot of old eggs of other hens that are sitting or breaking new laid eggs. His honest two words interchangeably; but, ac- blue eyes excited envy in the bosom cording to the standard of perfection, of many a lass, and even May Loring's proud heart thrilled with admira-The word breed applies to any class tion when his rich baritone filled the

But May had other ideals, She horns, Orpingtons, etc., while the word | longed to be a real heroine in one of and crowns covered flatly with woven variety denotes the different divisions life's wild dramas. She offred for Harry more than she dared admit, but tried to assure herself that she was "varieties"-Barred, White, Buff. The only firting with him. Harry, on the Barred Rock is not a breed, but is a other hand, became deeply in love. As they sailed in the moonlight or rode through the shady woods on Sunday afternoons he talked incessantly of happy days to come. May allowed him White, Partridge and Black to talk as he would. She thought it remantic to hear him thus con-

Summer waned. Soon came the time for May to return to her home. Harry at length grew disturbed. May had hardly intimated that she cared for him, and of late he had sometimes thought her cold. What could she mean? He must know, for soon they must separate, and, oh, would they part forever? By chance they did not meet until the day prior to May's departure. May's cheerful loveliness soon dispelled Harry's apprehensions, and they wandered through the wildwood to have their farewell talk. Coming to a shady dell. May sat down upon a knoll, while Harry reclined at her foet.

For the moment May's heart somewhat relented when she realized how infatuated Harry had become. Her lips trembled, and her eyes drooped. Harry of course noticed the change. He interpreted it to mean more than it did and passionately exclaimed:

"May, oh, May, you care for me! Tell me before we part that you love me; that you'll be mine!"

May's countenance changed, and there was silence. Did he guess that in her certainly reveal our tendency to move mind was that handsome stranger she had met in vacation? Whatever were his thoughts, he remained silent. Like are more imitative than original. We a statue he now stood, gazing upon her downcast face.

May's cheek was pallid, but her voice was cold and decisive as at length she the next word in ours. It is echoed replied: "Your wishes are exorbitant indeed.

I never can love you." Again a moment he stood proudly and then turned aside, saying:

"Then, Miss Loring, we must part." She saw him disappear among the trees. The following day they both left the village, she for her village

home, he for another clime. Mr. Sidney, with whom May had become enamored the vacation before, resumed his attentions as soon as May reached the village. With his easy manner, elegant address and gainly style he was May's ideal. Yet, after all, there was something about him that she repulsed. Despite her efforts. to dispel thoughts of Harry her langination ofttimes turned to him. Now that he was gong she felt his loss. She often secretly longed to look into his mild eyes and then for the moment disdained the restless demeanor of Mr. Sidney. But still the latter fascinated

her, and she implicitly trusted him. Thus a few months passed, and too soon Mr. Sidney was summoned, as be said, to his home. It was then that May learned that he had folled her; that all his charming pretenses had been false. Her tear stained eyes read the paragraphs where his marriage with another was announced.

Pain seldom comes singly. May was scarcely calmed when a message came that cut her still more deeply. Harry Hayford, the report read, and it had every proof, had died in an explosion in a mine.

Poor May's last hope vanished. Thoughts of the past were painful, and to evade them she destroyed every reminiscence. Removing to another place, she took up the duties of pre-

Twelve years passed, bringing little change. May's laughing black eyes be- Only one professional stenographer came serious, but they were gentle and has been found equal to the task of tender. The children adored her. Her reporting accurately all of Bryan's friends admired her and came to her words on the platform, and this man is for counsel and advice. Felicity ap- out to a harder strain than Mrs.

parently was hers. At last the illness of her mother recalled her to her native town. She en- husband; then when he busies himself tered it with aching heart. But, ah, she with other duties she runs a typewriter knew not fortune! It happened that with nimble fingers. It has been said one afternoon she was invited to the that Mrs. Bryan has refused a large house of a friend. During a short interval that she was left alone she took of her system, the chief merit of which up a case of photographs. As she lies in its simplicity. looked at them her eyes fell on one that made her heart bound and flutter. Old memories were brought vividly back, and, without resisting the impulse, she pressed the photo again and

again to her lips. "May!" She could not believe that she heard. Press. and terror seized her. The voice so strangely familiar now seemed weird

and unearthly. Galning courage, she looked up. Dazed beyond measure, she felt her brain confuse. Fainting, she fell into a woman can do with her own head. Harry Hayford's arms.

When she recovered of course there was an explanation. It was another Harry Hayford that had been killed. May, the schoolmistress, would be schoolteacher no more.

Castro's Palace of Steel. President Castro lives in what is probably the most remarkable dwelling place of any modern ruler. It stands within a park at Caracas and is built almost entirely of steel. The outer walls are covered with a kind of soft stone; so, to look at, there is nothing peculiar about the place, but it is said to be the strongest house in the Leave the fron on the paper until all world, and it will resist the heaviest

The idea of a steel "palace" occurred to the president after he had had experience of one or two earthquakes. One night he was awakened by an earth tremor, and in his fright he jumped out of a window and broke his leg. After that he decided that bricks and mortar were not safe; hence the reason for his metal abode.-Lendon M. A. P.

THE SLANG OF TODAY.

Will It Be the English of George Meredith or George Ade?

If the slang of today is the correct

speech of tomorrow, what language

will our children speak a generation hence? is the pertinent question asked by a writer in the Boston Transcript. Will it be the English of George Meredith or the English of George Ade? Shall we talk in the flowery hyperbole of the Bowery, with which our newspapers of today, and even our books, are filled, or must we be content with the speech that has satisfied many generations of our forefathers? As we saunter along in enjoyment of the invigorating spring air on a bright Sunday morning, whether we have been listening to the words of the preacher or merely taking our Sabbath pleasure in the open, shall we say to our children, "You kids hike along home," or shall we tell them, "Run along, and we'll follow?" Of course it will be needless to express ourselves in such grandlloquent phrase as "Children, journey home and behave yourselves decorously," for the youth of today would be ill manuered enough to laugh at us therefor, but there is a happy mean between the vulgar and the stilted, and correct and informal speech will fall upon childhood's ear like the words of an unintended sermon. As a matter of fact, a little slang is an excellent thing, but in the present era of slang more than the smallest quantity is a great deal too much. The English language may fairly be said to be the most picturesque and most expressive in the world, and it does not need the verblage of the slum or even the catchwords and catch phrases of the street to add to its vigor and variety. As a mashes are to be fed, skimmilk or butrule, the use of slang is indicative more of paucity of thought and idea than of to the mash. Milk in any form is a susceptibility to the humerous and the raluable source of protein, and the graphic. If we tell our friend "to get on to his job," "to get on to himself," "to get busy," "to get a move on" or any one of a hundred other things, we with the tide of the hour, but at the same time we clearly show that we speak slang frequently through sheer laginess. It was the last word in the mouth of a companion, and it becomes by the speaker, the teacher, by the lecturer, by the writer, but with rare exceptions it never becomes anything but slang. After all, it is only the best of siang that survives, but even then we need not excuse ourselves for becoming proficient in its use. We should think of the present as well as the future. Why use slang when we can speak the speech of our heritage equalty well? Why become the blind leaders of the blind?

A GENIUS IN SHORTHAND.

Mrs. Bryan Has Her Own Steno-

graphic System. Mrs. William Jennings Bryan is the only woman on record who has invented a stenographic system, and there is nothing impractical about the method, for she has proved its value in acting as secretary to her husband. Of course in the event of Mrs. Bryan becoming the mistress of the White House she will resign the work to a staff of secretaries of the Loeb order. but it is safe to predict that not a man will be found to give the same satisfaction to the great commoner. Mrs. Bryan's system is the growth of a egen years or since the stirring day in 1896 when her husband won his first presidential nomination by his 'cross of gold" speech. At that time the Bryan purse was so lean it denied the luxury of a paid secretary, and Mrs. Bryan elected berself to the pest. At first the work was slow and disconraging, but gradually Mrs. Bryan invented a stenographic code until now she easily follows her husband in his swiftest moments. Bryan is one of the quickest talkers before the public. and his wife's success seems almost impossible to expert users of the Pitman and other standard systems Bryan. Every morning after breakfast Mrs. Bryan takes a dictation from ber amount of eash for a complete chart

Beautiful Hair.

The secret of beautiful hair is in knowing how to make the most of it. how to coax and coddle it into growing and to arrange it to the best postible advantage, says the New York

It is the natural frame for the face. and whether or not this frame is becoming remains with the woman her-

It is wonderful what terrible things Combs are set in crocked, and in many cases a head of hair looks more the a bird's nest than a cofffure. To have pretty hair you first of all must have clean hair.

This means that you should shampoo It every two weeks. The hair catches even more dust than the face.

To Remove Furniture Dents. To remove furniture dents wet the scar with warm water. Sonk in warm water a piece of heavy brown paper, double it about four times, lay it over the dent and press with a hot fron. moisture is absorbed. If the dent is not then removed, repeat the process.

Mashes For Poultry. The feeding of mashes to poultry is not looked upon with so much favor at present time as formerly, says the Farmers Advocate. However, if termilk will make a valuable addition

pirds should be fed as liberally as pos-

itble of milk and its products.

Good Ice Cream. Good ice cream is good food. But it must be good and pure and clean. Good ice cream is delicious, wholesome and nonrishing. It has no aftermath to make people repent of eating it. It is strengthening to a glant and is helpful to the sick and dying so long as any food can be taken. Its origin seems to be obscure, but if it could be traced to any one person he would deserve a monument.

Thought Mail Was White Man's Food. The Rev. Hiram Bingham, recently arrived here from Honolulu, is one of the most picturesque figures in the modern history of the south seas. His life has been devoted to work in and for the Gilbert islands, which he first visited in 1857. When he first visited the Gilbert islands the natives had no knowledge of writing and had never seen paper. The first mail that arrived for the missionaries was stolen by the native carrier to whom it was intrusted and distributed in particles to the other natives, who are the scraps under the impression that they were some kind of white man's food.-San Frau-

cisco Chronicle. Culture In the Studio. The Rich American Artist's New Engish Butler (looking at Venus de Milo)-Excuse me, sir. Is it Lord Nelson? Artist-Oh, no: Nelson lost only one arm.-Harper's Weekly.

Great Wall Paper Sale

Having leased the building in the rear of Perry & Camp's store for a term of years and thoroughly repaired the same, we now have one of the largest and most convenient Wall Paper stores outside the large cities, and as an inducement for you to call on us we are going to offer you prices on Wall Paper that will be an incentive to buy NOW for future use, in fact, we shall offer you any pattern in our store at less than manufacturers' prices, as we have got to have the room for our new line, which has already begun to arrive. Remember that our goods are new and up to-date, nearly every pattern direct from the manufacturers for this year's trade. Over 400 patterns to select from. Don't forget the place!
